

WINDOW CLEANING

Internal windows and partitions are cleaned by us. We also clean low level external windows (no more than four stories). For safety reasons when doing high level windows we prefer to use a professional window cleaning company. We are happy to organise this for you.

VINYL FLOOR POLISHING

This involves removing any old floor polish or marks - that can be removed. A high quality polish with gloss finish is then applied with up to four coats depending on what you want. Using the right cleaning chemicals helps to keep it looking good.

CAR PARK SWEEPING

We have a variety of sweeping machines and clean internal multi-storey car parks, outdoor car parks and street frontage areas.

CONCRETE FLOORING SWEEPING

Sealing concrete makes it stain resistant and easier to keep clean.

TRADITIONAL FLOOR WAXING SERVICE

Our top end traditional floor waxing service is for hardwood floors. Often hardwood floors are the centre of attention in a reception area or even in a home. As it's a natural product (bees wax), it requires a little more maintenance than other polishes. However, if you want the great smell that comes from a freshly waxed floor, and that warmth and swirly sheen, then it's worth the extra cost.
