

HYGIENE AND CLEANING PRODUCTS

We use BIODEGRADABLE products and the correct amounts of dilution, which is often overlooked in caring for the environment.

A MAF APPROVED C31, C32 disinfectant is used in the toilet areas, to clean away infection and bacteria, leaving them sanitary.

SEPARATE EQUIPMENT is reserved for the cleaning of toilet areas and rubber gloves are worn.

WE DO NOT CARRY TOILET BRUSHES AROUND. This means there is no chance of contaminated water dripping onto surfaces and other areas, outside the toilet area. All toilets we clean must have their own toilet brushes.

We use YOUR DISHCLOTH IN YOUR CAFETERIA - not some stray cleaning cloth.
